

Pioneering a New Marketplace

Udemy is the global marketplace for education that gives people everywhere the opportunity to advance their careers, change professions, develop a personal passion, or simply learn something new.

We all have limitless potential to learn and nothing should stand in the way of our aspirations. But today's jobs require ever-changing skills. Traditional education can't keep up and most employers don't invest enough in training. Udemy gives individuals the power to shape their own futures by putting on-demand courses within reach.

Market for most in-demand skills

The Udemy marketplace offers an almost infinite number of courses to help people get where they want to go in their lives and careers. We empower everyday experts to create courses on topics they've mastered, which allows our collection to constantly evolve to include the most sought-after business and technology skills as well as courses on personal development, hobbies, and more.

Global reach

Udemy is accessible to people everywhere. With two-thirds of our students outside the U.S. and courses in more than 80 languages, Udemy students live in every country in the world.

Flexibility and convenience

Udemy students don't have to go to a physical classroom or adjust their lives to someone else's class schedule. Instead, they can learn on their own terms and on any device, whenever it's convenient, no subscription required.

Enabling business

Udemy enables businesses to quickly roll out training to their employees on the latest technology and trends, or to easily create their own proprietary training content. Our cloud-based platform scales seamlessly and is mobile-friendly, so employees can stay productive wherever work takes them.

About Udemy

Udemy was founded in 2010 with the aim of improving lives through learning. Udemy is a global marketplace for learning and teaching online where more than 15 million students learn from an extensive library of 40,000 courses taught by expert instructors in 80 different languages. Whether learning for professional development or personal enrichment, students can master new skills through self-paced, on-demand courses, while instructors have a way to share their knowledge with the world.
